TOOLS

- VS Code
- Git
- Cargo
- npm
- Windows 11
- Tauri CLI

i build things that live close to the metal.
this is where i keep them.

// ABOUT

Systems-focused developer building desktop utility software with Rust and Tauri. Obsessed with performance, low-level tooling, and clean architecture. Based in Cebu City, PH.

// EXPERIENCE

Systems Developer – Personal Projects

2024 – PRESENT

- Built windows-operation-runtime: a Tauri 2 + Rust desktop utility
- Implemented DNS flushing, temp clearing, port and file management
- Designed cinematic boot sequence with GSAP and anime.js animations
- Maintained structured GitHub branching workflow across all phases

// PROJECTS

BUILDING windows-operation-runtime

- Local utility app for Windows system operations.
- Stack: Rust · Tauri 2 · Vanilla JS · GSAP
- github.com/jABurat23/windows-operation-runtime

LIVE personal.archive

- Portfolio and public archive – the site you are viewing.
- Stack: Next.js · TypeScript · Framer Motion · anime.js

// EDUCATION

Self-taught – Systems & Desktop Development

- Rust programming, systems design, memory management
- Tauri framework, cross-platform desktop tooling
- Frontend: React, Next.js, TypeScript, animation libraries
